

Plant Theatre™ makes dramatic debut at GLEE

Impress your neighbours with a Plant Theatre™! It's the easiest way to create a dazzling display of your favourite pot plants in your home or garden.

Plant Theatre™ is the simple/stylish solution to a simple problem – how best to display your favourite pot plants to maximum effect, but with a minimum of effort.

Available in a range of colours in either metal or wood, Plant Theatre is a shelving unit which can be wall mounted or free standing. In addition, the unit's three shelves are tiered, allowing complete flexibility for differences in plant heights.

Inspired by the original 17th and

18th-century auricula theatres, Plant Theatre is a smaller-scale version which is easy to move around. Auricula theatres were primarily designed to display pots of auricula primroses, but Plant Theatres are perfect for any indoor or outdoor pot plant. Within minutes, any gardener or non-gardener can use a Plant Theatre to complement and enhance the décor of their home, garden, terrace or courtyard – however large or small.

Plant Theatre was exhibited for the first time in the UK at GLEE. The company's founder, Peter Magee, is hoping to find retail buyers and distributors to supply Plant Theatres to the UK and international gardening and gift markets.
